

**T**his residence is located within an affluent Sukumvit community in metropolitan Bangkok. Designed for a couple with a young daughter. This four bedroom house offers a more contemporary lifestyle and easy maintenance.

Contextually speaking, the house is surrounded by concrete jungle. The owners requested that the house provide them with some degree of privacy.

The architectural focus of the voided space is an open circular court wrapped around by an L shaped floor plan. A circular stair case that wraps around the pond and the waterfall was designed to links the ground floor and courtyard.
